SUMMARY

Full Stack Developer with 3+ years of experience building SaaS, enterprise, and manufacturing applications using .NET, C#, React.js, Blazor, SQL Server, PostgreSQL, and MongoDB. Experienced in AI-powered solutions using Azure OpenAI, microservices, REST APIs, legacy system modernization, data-intensive applications, and CI/CD. Proven experience delivering end-to-end solutions across legal technology, automotive, and manufacturing environments.

TECHNICAL SKILLS

Languages: C#, VB.NET, JavaScript, TypeScript, SQL
Backend: .NET 8, .NET Core, .NET MVC, Node.js, Express.js, REST APIs
Frontend: React.js, Next.js, Blazor, HTML5, CSS3
Databases: SQL Server, PostgreSQL, MongoDB
DevOps/Cloud: Azure DevOps, GitHub Actions, CI/CD, Docker
Testing/Tools: MSTest, xUnit, JIRA, Git, SSIS
AI-Assisted Development: GitHub Copilot, Claude, OpenAI Codex

PROFESSIONAL EXPERIENCE

Practice AI, Los Angeles, California December 2025 – June 2026
Full Stack Developer – Remote

- Developed and maintained a **SaaS platform for law firms**, building full-stack features and AI-powered services using .NET, Blazor, and Microsoft Azure.
- Implemented **AI-powered Demand Generation using Azure OpenAI**, processing and analyzing user-uploaded legal documents to generate contextual demand content for legal workflows.
- Developed **Litigation Support** features that provide easy access to relevant and similar case studies for legal research and case preparation.
- Built **AI-powered document summarization** capable of processing and summarizing documents containing hundreds of pages.
- Implemented **AI Intake** functionality for handling and processing client interactions through calls and messages.
- Integrated the **Stripe API** to support payment and billing functionality within the SaaS platform.
- Developed and maintained **third-party integrations** to connect the platform with external services and extend system capabilities.
- Contributed to a **microservices-based architecture**, automated testing, and GitHub CI/CD pipelines for reliable builds, testing, and deployments.

Vértere Global Solutions, Inc., Makati City April 2025 – December 2025
Programmer | Analyst II – Hybrid

- Assigned to **Toyota Motor Philippines**, developing and maintaining enterprise applications supporting data-intensive business operations.
- Developed **data-driven systems involving complex calculations, large datasets, and business reporting** to support operational analysis and decision-making.

- Modernized and **migrated legacy applications to modern technology stacks**, improving maintainability, usability, and long-term system support.
- Developed a **Sales Forecasting System** that analyzes historical monthly sales data to support forecasting of future sales across individual vehicle models.
- Built and maintained full-stack applications using **React.js, JavaScript, .NET, and SQL Server**, integrating front-end interfaces with backend services and databases.
- Designed and optimized **SQL Server databases, stored procedures, queries, and data-processing workflows** for data-heavy applications and reporting.
- Developed and maintained **ETL processes using SQL Server Integration Services (SSIS)** for data integration, transformation, and migration.
- Utilized **Azure DevOps and Azure Repos** for source control, code reviews, task management, and collaborative development within an Agile environment.

ROHM Electronics Philippines, Inc., Carmona City

May 2023 – April 2025

Full Stack Developer

- Developed and maintained **internal web applications to digitalize paper-based manufacturing processes**, including production check sheets, helping transition manual workflows into centralized paperless systems.
- Developed **Windows applications for process automation**, including automated data collection and transfer between production systems to reduce manual data handling.
- Built **production dashboards and monitoring systems** that provided teams with centralized visibility into manufacturing data, operational status, and production information.
- Developed full-stack web applications using **.NET Core, ASP.NET MVC, C#, VB.NET, JavaScript, HTML5, CSS3, and Bootstrap**.
- Designed and optimized **SQL Server databases, T-SQL queries, stored procedures, and database structures** supporting internal manufacturing applications.
- Developed backend services and asynchronous integrations using **Node.js, Express.js, and REST APIs** to facilitate communication and data exchange between systems.
- Created technical documentation for developed applications to support system maintenance, knowledge transfer, and end-user adoption.

TRAININGS AND CERTIFICATIONS

- **Microsoft Certificate of Achievement**
Developing ASP.NET MVC Web Applications
MISNet Education Inc., *Makati City* - August 2024
- **National Certificate II**
Computer Hardware Servicing (PASSER)
TESDA
Philippine TVET Qualification System

EDUCATIONAL ATTAINMENT

- **Bachelor of Science in Computer Engineering**
Cavite State University – Carmona
Graduated in April 2023
Vice President Lister
- **Science, Technology, Engineering, and Mathematics (STEM)**
AMA Computer College – Biñan Campus
Graduated in May 2018
High Honor
